

JERSEY OIL BELT REACHES CANADA

Dr. H. J. Van Hagen Says
Vein Is Nowhere Beyond
15 Miles Wide.

MINERAL WAX FOUND TOO

Syndicate Controls 66,000
Acres and Gets \$100,000
Offer for Well.

PHILADELPHIA, Nov. 5.—Since Dr. H. J. Van Hagen and his associates have been able to locate oil in commercially valuable quantities in a well they have sunk a few miles southeast of Millville, N. J., the capitalists have become interested. Dr. Van Hagen says he and his associates have received a \$100,000 offer from which they can now get about seven barrels of oil a day, though the field has not been reached.

In addition to buying nearly 6,000 acres of land, lying mostly between the Manantia Creek and the Manantia River, about 30,000 acres have been leased in the vicinity of Manantia. Dr. Van Hagen, who has been an oil operator in Texas and Wyoming, justifies the leasing of the large area on the ground that he has discovered a new field.

He says the oil belt starts near Monmouth, N. J., reappears at the eastern end of Long Island, runs near Lakewood, N. J., and south of Dover, and actually comes to the surface near Cassville. The general direction of the field is northeast by southeast, and it extends into Maryland and West Virginia.

The belt varies in width, but at no point exceeds fifteen miles, so far as indicated by data which Dr. Van Hagen has secured in compiling as the result of personal visits to the regions mentioned.

In drilling near Millville a great variety of formations were encountered. After ten feet or so of sand and clay a four-foot vein of 47 per cent. iron ore was struck. Trenton rock was passed through and finally came a sixty-foot layer of oil-bearing shale of superior quality. This shale is said to be similar to the Dunfries shale in Scotland. Immediately after this came the true oil-bearing sandstone, through which the drill is now being driven.

Only second in importance to the discovery of the oil was that of a large deposit of coconite, a mineral wax deposited as a result of the distillation of petroleum. It was found beneath a layer of trap rock, which was sufficiently open to allow the light oil and gas to evaporate, leaving the wax as a deposit. The only other commercially valuable mineral wax deposits, it is said, are in California and Utah.

According to Dr. Van Hagen, the New Jersey deposit is worth working and could be mined somewhat as sulphur is in Louisiana, by steam melting coconite, which distills, makes candles, and so on, to ordinary kerosene. He adds that the deposit is not so easily, and also provides certain light oils and a product similar to vasoline. The residue, called okonit, is extensively used as an alloy in manufacturing black rubber insulating material.

Red Cross Plans Big Seal Sale.
While 5,500,000 Red Cross seals at one time were sold in Manhattan and the Bronx in the holiday season last year, the proceeds going to the tuberculosis, prevention campaign, the committee expects the sales this year to exceed this record. Offices have been opened at 7982 Metropolitan Building. The mail sales plan of former years is being greatly enlarged.

HERRICK ADMITS HIS MOTOR KILLED WOMAN

"I Had Been Drinking at My Club," Confesses Member of Old Albany Family.

ALBANY, Nov. 5.—William C. Herrick, member of one of Albany's oldest families, who was arrested last week in connection with the death of Mrs. Thomas Fawcett, who was run down by an automobile a week ago Saturday night, confessed to District Attorney Alexander to-night. Herrick said he did not remember running down the woman, but admitted he had been drinking. The rim of an automobile lamp found near the body of the woman killed by Herrick's car and when he was confronted with this fact he said the weight of evidence seemed to be against him, but that he did not remember the accident.

Herrick's statement to the District Attorney was to the effect that after he had reached home his wife was complaining of a headache and when he was found later with the lamp rim missing.

"I had been drinking at my club," said Herrick, "but did not realize the seriousness of my condition until I reached home."

The case, which will be presented to the Grand Jury this week, has aroused the indignation of the citizens of Albany because of the fact that the woman after being struck was allowed to remain in the roadway by Herrick, who did not stop his car. Herrick has been married a year.

COLOMBIA VOTES U. S. PROTEST.

Congress Criticizes Delay in Ratifying Treaty.

BOGOTA, Colombia, Nov. 4 (delayed).—Resolutions protesting against the conduct of the United States in regard to the Panama question were adopted by the Colombian Senate and House of Representatives to-day.

Ratification of the long pending treaty between Colombia and the United States regarding Panama has been withheld by the United States Congress. According to the treaty as amended by the Senate Committee on Foreign Relations last February the United States is to pay \$15,000,000 to Colombia. The amount originally proposed was \$25,000,000.

The treaty also says that the government of the United States and Colombia, "wishing to put at rest all controversies and differences between them arising out of the events from which the present situation on the Isthmus of Panama resulted, express sincere regret that anything should have occurred to interrupt or to mar the relations of cordial friendship that had so long subsisted between the two nations."

\$25,000 Fire at Hollywood Club.
ANSELY PARK, N. J., Nov. 5.—Fire, believed to have started from defective wiring, destroyed this afternoon the locker building, barber shop, grill, shower room and garage of the Hollywood golf club at Anseley, entailing a loss of \$25,000. A thirty-foot windmill tower also was burned. A shift in the wind saved the clubhouse.

A chilled motor will crack cylinders, freeze radiators and make hard starting your car.

TO MEN WHO THINK!

For weeks your intelligence has been insulted by false statements contained in page advertisements paid for by the Republican National Committee and by members of the Republican Old Guard who waxed fat under a Republican tariff that worked all the time for their Republican pocketbooks and against yours.

These high priests of special privilege are trying to make you forget.

They want you to forget that they themselves were responsible for the Republican panics, the inevitable results of years under Republican tariffs—the panics of 1873, 1893, 1903, 1907, and 1913.

They want you to forget the want, the misery, the despair caused by these Republican panics!

They want you to forget the strikes and lockouts at Homestead, at Paterson, at Lawrence, at Fall River, at Cripple Creek, at Wilkesbarre under Republican rule.

They want you to forget the days when Republican tariffs worked with machine-like precision, when men and women who longed to do right were driven to acts of desperation in order to keep body and soul together.

Or---If You Will Remember---

They hope by talking of business disaster and unemployment to make you afraid to vote as your conscience and common sense dictate—FOR PRESIDENT WILSON.

But facts knock their misstatements cold.

If there was the slightest danger of a business let-up following the return of peace,

Would Henry Ford, a Republican and head of an industry employing 45,000 men, be supporting President Wilson?

Would George F. Johnson and H. B. Endicott, of The Endicott-Johnson Company, Republicans and owners of the largest shoe manufactory in the world, be supporting President Wilson?

Would Isador Jacobs, Independent and President of the California Canneries Company, the largest concern of its kind in America, be supporting President Wilson?

Would F. D. Underwood, Republican and President of the Erie Railroad, be supporting President Wilson?

Would Thomas A. Edison, Republican, the world's greatest inventor and employer of thousands of men, be supporting President Wilson?

Would the Iron Age, in its November, 1916, issue, say:

"The pig iron market of the past two weeks is practically without a parallel in the experience of present-day producers. The advances are unprecedented, in being due, not to a clamorous demand for iron for quick shipment, as in all previous excited markets, but to a simultaneous effort of buyers to cover far forward requirements—in many cases through the second half of 1917."

If you want War and Panics,
Vote for Hughes with Roosevelt.

IF YOU WANT PEACE WITH HONOR
AND CONTINUED PROSPERITY

VOTE FOR WILSON!

Democratic National Committee.

Friday Opening Game Day in Jersey.
Friday is the opening day for upland game animals and birds in New Jersey. On that day quail, rabbit, squirrel, mink, English pheasant, pheasant, quail, prairie chicken and Hungarian partridge may be killed. The open season lasts until December 15.

The season has been open for some time on migratory waterfowl and shore birds and raccoon.

The bag limit is as follows: Two rabbits, 10 quail, 3 ruffed grouse, 3 English pheasants, 3 Hungarian partridges, 10 woodcock, 20 ducks, 10 each of geese and brant a day.

To hunt in New Jersey is necessary to take out a license, which can be obtained from any county, city or town clerk or any deputy clerk of any town clerk or resident in \$10.10 and to the resident \$11.10. It is unlawful to hunt without a license.
